

Boeing and Qatar have been partners since 2006, when Qatar Airways placed its first order for 78 Boeing 777 airplanes. Since then, Boeing's relationship with Qatar and commitment to supporting Qatar National Vision 2030 and the Third Qatar National Development Strategy have strengthened, with Boeing present in all sectors of aerospace in the country. In 2024, Boeing and Invest Qatar joined forces to establish a new legal entity, Boeing Aerospace Doha LLC, with a focus on research and technology advancements, support for startups, sustainable aviation initiatives, and the cultivation of a skilled workforce. The same year, Boeing appointed its first managing director in Qatar.

## Boeing Commercial Airplanes

Since the beginning of our partnership in 2006, Qatar Airways has placed multiple orders for Boeing airplanes. In 2013, Qatar Airways ordered 60 777X new widebody airplanes. In January 2022, Qatar Airways expanded its commitment to the 777X family by becoming the launch customer for the newest 777-8 Freighter, with a confirmed order of 34 airplanes and options for an additional 16 freighters. In July 2024, Qatar Airways announced an order for 20 more Boeing 777-9 passenger jets. In May 2025, Qatar Airways ordered up to 210 widebody jets, which sets new records as the largest widebody order for Boeing including the largest order for 787 Dreamliners and Qatar Airways' largest ever order. The order includes 130 787 Dreamliners and 30 777X, with options for additional 50 airplanes. Qatar Airways currently operates more than 150 Boeing airplanes, including 777 and 787 passenger jets and 777 Freighters. With the latest purchase, Qatar Airways will become the largest 787 Dreamliner operator in the Middle East. Qatar Airways has 261 Boeing airplanes on order: 124 777X and 137 787 Dreamliners. These new airplanes will support the carrier as it expands its passenger and cargo capacity. In addition, Boeing is collaborating with Qatar Airways Cargo to develop connected cargo solutions that will enable greater operational efficiency, with a focus on the 777-8 Freighter.

## Boeing Defense, Space & Security

Boeing provides support to the Qatar Emiri Air Force by facilitating iconic platforms such as the F-15QA (Qatar Advanced) fighters, the C-17 Globemaster transport airplanes and the AH-64 Apache helicopters. All of them have been utilized to protect Qatar's air, land and sea borders and have been deployed to conduct humanitarian missions across the globe. The F-15QA and the AH-64 Apache flew during large-scale events in Qatar like the 2022 FIFA World Cup

## Community engagement

Boeing collaborates with education and nongovernmental organizations in Qatar on a range of initiatives to develop local talent and support the ambitious growth plans of the country. Over the last decade, Boeing invested \$2 million in STEM education and workforce development in Qatar. Boeing supports initiatives of Qatar University focused on uncrewed aerial vehicles (UAVs) for air quality monitoring and a robotics competition at this university. Additionally, Boeing partners with INJAZ Qatar on the entrepreneurship program and STEM workshops at schools in Qatar.

## Boeing Global Services

Boeing works closely with the Qatar Emiri Air Force, providing training and sustainment for the C-17 fleet. Boeing is also providing spare parts, support and test equipment, maintenance support, training devices, and aircrew and maintenance training for Qatar's fleet of AH-64 Apache helicopters. In addition, Boeing is providing in-country spare parts, maintenance, training, program management and logistics support for the F-15QA fighters. To ensure mission readiness and smooth support of all defense platforms, Boeing is growing its workforce in Qatar. In the commercial sector, Qatar Airways utilizes Boeing service offerings, including spare parts, training solutions and modification services, to enhance the passenger experience. Digital solutions such as the Boeing Maintenance Performance Toolbox, Airplane Health Management and a broad range of flight deck and flight operations solutions provide Qatar Airways with real-time access to maintenance, flight and aircraft performance information to optimize efficiency, lower fleet operating costs and reduce emissions.

## Boeing Research & Technology

Boeing is committed to advancing innovation and technology through strategic partnerships with universities and research institutions in Qatar. These partnerships include hosting an annual symposium on machine learning and data analytics and conducting joint research with the Qatar Computing Research Institute (QCRI) to better understand correlations in data produced by aerospace systems and improve the early detection of small objects for safer landings.

## Aircraft models delivered and operating:

### Qatar Airways

737-8, 787-8, 787-9, 777-200LR,  
777-300ER, 777F

### Qatar Emiri Air Force

C-17 Globemaster III, AH-64E Apache,  
F15QA Ababil

## Services

### Commercial

Maintenance, flight, materials and training services

### Defense

C-17 training and sustainment;  
AH-64 spares, support, maintenance and training; F-15QA spares, support, maintenance and training; Enterprise Resource planning/logistics;  
Management information system

## A HISTORY OF PARTNERSHIP

### 2006

Qatar Airways announces first Boeing order for 78 777s

### 2008

Qatar starts operating the C-17 Globemaster III airlifters

### 2010

Boeing office in Qatar opens

### 2014
